

Environmental Policy

Cube Install Limited is committed to leading the industry in minimising the impact of its activities on the environment.

The company is committed to review this policy annually, or at such a time as recommendations/legislation are made. This is done through a framework where management regularly review its objectives and how the business has performed against these, consult with its staff and set new objectives for continual improvement.

Our employees and sub-contract labour have a duty to cooperate in the operation of this policy.

The key points of our strategy to minimise our impact on the environment are:

Educate our staff on environmental aspects and consider environmental impact in our decision-making processes.

Minimise waste by evaluating operations and ensuring they are as efficient as possible; any waste arising will be recycled where possible and disposable by licensed contractors.

Minimise toxic emissions through the selection and use of its fleet and the source of its power requirement.

Where possible CFC free products will be used.

Actively promote recycling both internally and amongst our customers and suppliers.

Source and promote products that minimise the environmental impact of both production and distribution.

Meet or exceed all the environmental legislation that relates to the Company.

Work to a UKAS registered ISO 14001 Environmental Management System.

The directors and management are committed to fulfilling its compliance obligations with this policy and will monitor this on an annual basis.

Signed:

Tim Percival

Position: Director
